

QTIP Quality Improvement Ideas

SMART Aim:
Increase COMBO 10 and Adolescent vaccination rate by 10% from baseline

Key Drivers

COMBO 10

EV-3

INFLUENZA VACCINE

COVID VACCINE

ADOLESCENT IMMUNIZATION

Secondary Drivers

Improving WCC rates

Staff Education

Address vaccine hesitancy

Social Media Campaign

Vaccine Availability

Improving Access

Practice workflow

Policy changes

Change Ideas

Identify "Champions"

Staff lunch and learns

Work on system for rescheduling WCV no shows

Train and implement use of motivational interviewing

Identify patients not UTD on WCC

Offer immunizations with sick visits/ADHD visits and MH visits

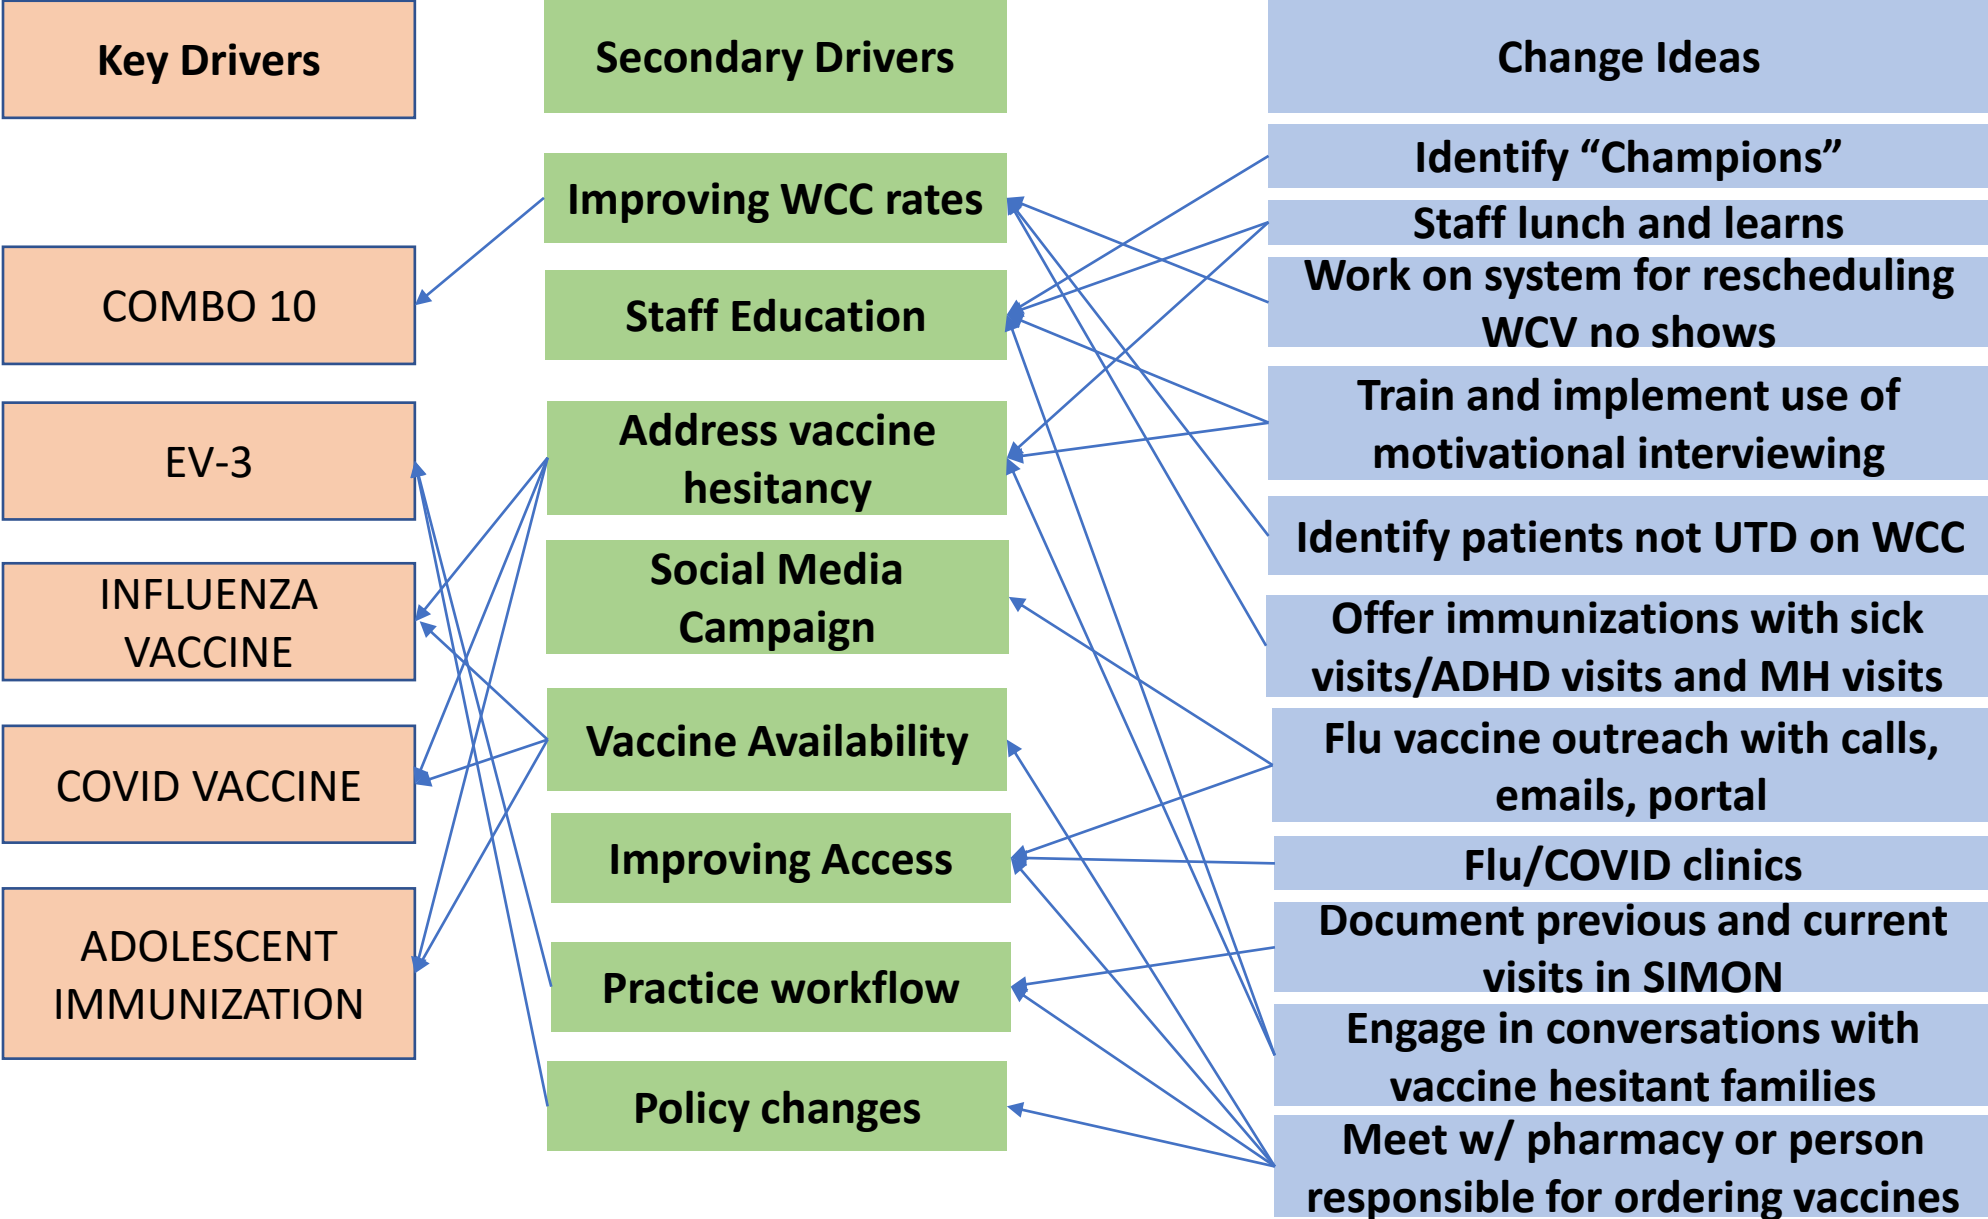

Flu vaccine outreach with calls, emails, portal

Flu/COVID clinics

Document previous and current visits in SIMON

Engage in conversations with vaccine hesitant families

Meet w/ pharmacy or person responsible for ordering vaccines

Quality Improvement(change) Ideas

- Increase front desk and provider knowledge and comfort with AAP immunization recommendations, intervals and contraindications
- Implement actions to teach clinical staff and providers best communication practices to help combat hesitancy/refusal
- Launch a Flu health campaign and offer a Flu/COVID vaccine clinic
- Engage immunization “champions”
- Improve completion of HPV vaccine series
- Make every visit a vaccine visit (even those outside of WCC – sick/ADHD/mental health)
- Add Z code for under immunized to problem listing to increase provider awareness at other visits when vaccination could occur outside WCC
- Meet with administration/pharmacy about running out of vaccine
- Incorporate DHEC resources

QI (change) Ideas Continued...

- Improve Combo 10 rate
- Document current and previous vaccines in SIMON
- Offer motivational interviewing training for providers
- Work on a system for rescheduling WCC no show visits
- Identify patients not UTD on well checks and those behind on vaccines
- Utilize EMR to pull charts on patients not UTD on shots
- Educate HCP and staff on vaccine verbiage and vaccine schedules
- Engage in more conversations with vaccine hesitant parents
- Develop script to discuss COVID vaccine
- Work with parents to increase their confidence about the COVID vaccine
