

## Chat Session QTIP Meeting 8-4-2020

- from Kristine Hobbs to all participants: 6:24 PM I hope Dr. Jones will share her new plans with all of you. she has really done some great work to support her patients with anxiety and depression.

### **Fact Forward:**

- from Eliza Varadi to all participants: 6:38 PM do vaccines count? is if a 15 year old who's parents are no vaxxers want to get vaccines, can we do it legally?  
from Deborah Greenhouse to all participants: 6:39 PM Great question, Eliza!
- from Sheila Woods to all participants: 6:51 PM Drug testing a teenager without his/her consent will damage your relationship with that patient. It takes negotiation with parent, and with teen.
- from Deborah Greenhouse to all participants: 6:52 PM If right to consent is also right to refuse, can't all kids conceivably refuse vaccines as well?
- from Joy Johnson to all participants: 6:59 PM We have a "disclosure of medical information" form that we have parents fill out or patients 18yr + fill out and list anyone that they allow us to speak to in regards to the patient's medical information. You mentioned that the provider can't disclose the reason a 16 yr old came in due to HIPPA, should we maybe have patients 16 and older complete these forms?

from Joy Johnson to all participants: 7:02 PM Thank you Lane, we may need to ask/look into one for that age as well. Ours specifically says for 18 and older.

### **Asthma:**

- from Kristina Gustafson to all participants: 7:14 PM We are fortunate enough to have spirometry one floor above us. We schedule for the patient to have spirometry at the same time as the next visit, with the PFT appt first so the patient will bring the PFT result with them when they come to see us in primary care.
- from Kristina Gustafson to all participants: 7:24 PM We have a paper asthma discharge sheet that we used about 5+ years ago, which included prompts for assessing asthma triggers (w recommendation for referral to Project Breathe Easy for pts w +triggers, reminding about providing an updated AAP, & ordering annual PFTs. We have the ACT on the back...please let me know if you would like me to send it to you, Ram, to possibly share with the collaborative.

### **Screeners**

- from Sheila Woods to all participants: 7:22 PM What screeners qualify as anxiety screeners in QTIP practices?
- from Kristine Hobbs to all participants: 7:23 PM i just pulled the survey data. a few practices are using the GAD; one the SCARED regularly, some use PSC
- from Sheila Woods to all participants: 7:23 PM Much easier to administer than the SCARED screen. I really like

- from Sheila Woods to all participants: 7:23 PM GAD-7 and is well validated for screening.
- from Sheila Woods to all participants: 7:24 PM I like the PSC-35 or PSC-17 also because they are more general psychosocial screeners for Attention, Internalizing symptoms (Depression/Anxiety) and Externalizing symptoms (ODD, Conduct)
- from Kristina Gustafson to all participants: 7:25 PM We use the PSC-17 at MUSC...like it too!!!
- from Nan Krueger to all participants: 7:25 PM Kristina - could you have Lynn send it out?
- from Eliza Varadi to all participants: 7:25 PM we use psc
