

CareSouth Carolina Bishopville Pediatrics

Practice Presentation: Spirometry Use in
Asthmatic Population

Morgan Windham, DNP, MSN, CPNP-PC

Morgan.Windham@caresouth-carolina.com

What Fuels Our Process

- * Practicing guideline-based diagnosis, management and follow up
 - * Step-wise approach
- * Frequency of visits
 - * High no show rate
- * Flexibilities within our schedule
 - * Adjusting appointments – modifying sick visits to include asthma follow up

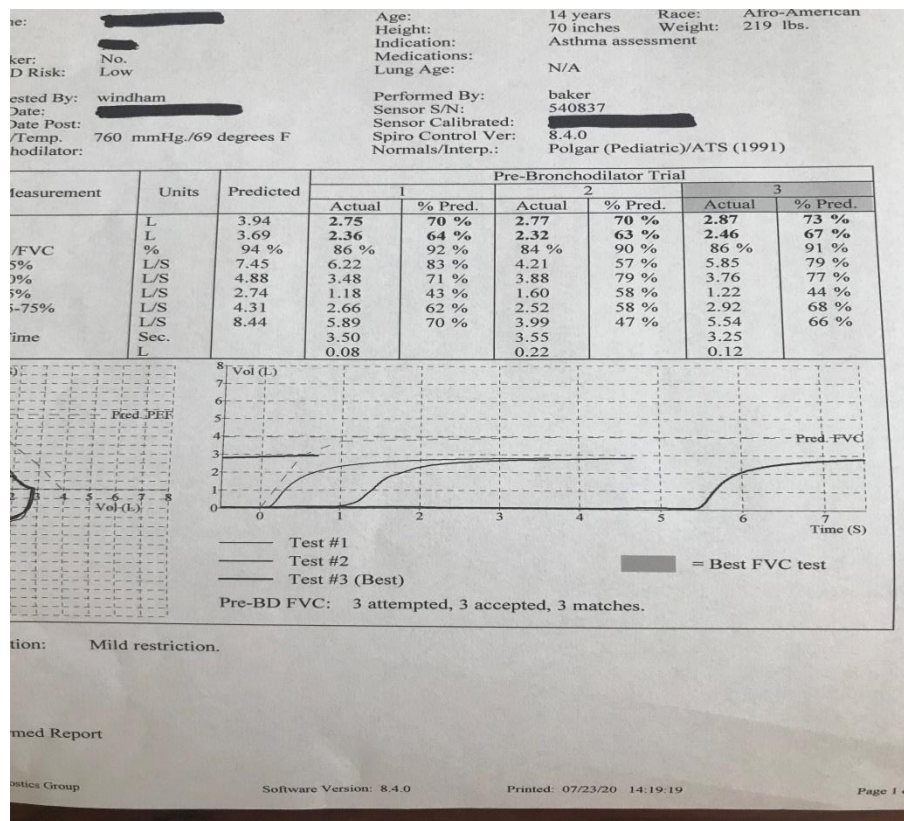

Our Workflow

- * Reviewing schedule prior to appointment time
- * Adding chart “flags” when follow up or spirometry needed
- * Reviewing chart for number of refill requests, sick visits, follow up visits
- * Upon arrival for appointment
 - * Nurse performs spirometry during work up

Mechanism Used

- * Midmark IQ Spiro
- * Requires calibration – nurses perform daily or prior to procedure

What's changed?

Pandemic and
impact on
Spirometry

I DON'T KNOW...

YET!
